Treatment of Sweating
Pre Treatment & Aftercare Instructions

Instructions Before Your treatment

- * Shave armpits 2 days prior to appointment
- * Do not use deodorant /anti perspirant for 24 hours prior to procedure.

Instructions After Your Treatment

- Do not apply deodorant /antiperspirant for 24 hours post procedure
- Botox usually takes 7-14 days to take effect. Do not be disappointed if you have not seen an effect after 1 week as some people will take longer than usual. Occasionally, some patients will require a second treatment at 2-4 weeks to achieve a result.
- Make an appointment for 2 weeks time for a check up. Some patients require a repeat injection. Thereafter depending on the area and condition being treated. A maintenance injection may only be required every 6-12 months. The approximate duration differs from person to person and averages at 7 months.
